## DETAILED ACTION

### *Priority*

1. Applicants' claim for priority, based on papers filed in parent application Serial No. 09/395,316 submitted under 35 U.S.C. 119, is acknowledged.

### *Claim Objections*

2. Claim 1 is objected to because it is unclear. Claim 1 recites on line 10: "the first plurality of openings extending from the first conduction terminals" and on line 14: "the first plurality of openings extending from the second conduction terminals", which features are not supported in the description and in the drawings. As best as can be understood, the phrase on line 14 should be: "the second plurality of openings extending from the second conduction terminals".

### *Double Patenting*

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 2818

4. **Claims 1-19** are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-17 of U.S. Patent No. 6,633,060. Although the conflicting claims are not identical, they are not patentably distinct from each other. Claims 1-19 of the present invention is a similar version of the claimed invention in claims 1-17 of the above-identified U.S. Patent with similar intended scope.
